**E. Description of Uses of Collected 911/E911 Fees**

- 1. Provide a statement identifying with specificity all activities, programs, and organizations for whose benefit your state, or political subdivision thereof, has obligated or expended funds collected for 911 or E911 purposes and how these activities, programs, and organizations support 911 and E911 services or enhancements of such services.**

The Statewide 911 Board expended funds as follows:

1. to pay the board's expenses in administering this chapter and to
2. develop, operate, and maintain a statewide 911 system.

The Statewide 911 system is the public safety ESInet operated on behalf of the board by an independent contractor. The public safety ESInet receives all wireless 911 calls from every carrier and routes the call to the appropriate PSAP. The network is also used for Text to 911 Services.

The Statewide 911 Board distributes funds to the county auditor in each of the 92 counties. The counties fiscal body (county council) has the statutory authority for the appropriation of funds. The executive branch (county commissioners) have the statutory authority to approve claims for payment from the appropriated funds.

IC 36-8-16.7-38 (see 2a above) restricts the use of the 911 funds at the local level.

In CY 14 counties reported expenditures in the following areas:

Personnel

911 Network/Equipment

CAD Hardware/Software

GIS Mapping

Training/Education

Operational Costs

Call Logging Equipment

**4. Please provide a description of any NG911 projects completed or underway during the annual period ending December 31, 2014.**

The Statewide 911 Board in cooperation with the Indiana Department of Administration published Request for Service 15-12 in July, 2014. RFS15-12 calls for a single statewide wireless ESInet (as is the case today) or for multiple ESInet deployments. At the December 2014 meeting of the Statewide 911 Board, award letters were granted to AT&T and Indigital Telecom for the build out and operation of (2) two statewide wireless ESInet that meet the i3 standard and are totally redundant. Indiana's move to more than a single ESInet was done for two very important reasons. First, redundancy and disaster recovery operations that will allow either vendor to receive and route any wireless 911 call to any PSAP in the State of Indiana or the bordering counties in Michigan, Ohio, Kentucky and Illinois. Second, this is the means in which Indiana will the PSAPs which are in a legacy environment to an i3 IP enabled platform. The end result is that the entire state will be i3 compliant and NG operational.

Completion date is 18 to 24 months.
